PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate seeking an entry-level **Software Testing/QA Automation** role. Possesses a strong foundational knowledge of the SDLC and STLC, alongside hands-on experience in manual testing, test case design, defect tracking, and database validation. Equipped with practical skills in building automation frameworks using **Selenium** and automating API validation using **Postman** and **Rest Assured** to ensure robust software quality.

TECHNICAL SKILLS

- **API Testing:** Rest Assured, Postman, Swagger UI, REST API Testing, JSON Validation, Newman Reports
- **Automation Testing:** Selenium WebDriver, Rest Assured, TestNG, Appium, Robot Framework, Maven, Page Object Model (POM)
- **Manual Testing:** Functional/Non-Functional, Black Box, Regression, Smoke, Sanity, Exploratory Testing, Test Case Design, Bug Reporting
- **Programming & Databases:** Java, Python, MySQL, SQL, SQL*Plus
- **QA Concepts & Tools:** SDLC, STLC, Defect Life Cycle, Agile/Scrum, JIRA, TestRail, Git, GitHub, Jenkins, MS Excel

PROJECTS

REST API Automation Project (Swagger UI)

Tech Project

Tools & Frameworks: Rest Assured, Swagger UI, Java, TestNG, Maven, Git, GitHub

- Built an API automation framework using Rest Assured, Java, TestNG and Maven to automate end-to-end CRUD operations by validating status codes, headers, payloads and JSON responses from Swagger-documented APIs.
- Designed reusable test scripts with assertions, request specifications and response validations to improve automation maintainability.

E-Commerce Automation Framework

Tech Project

Website: SauceDemo — Python — Robot Framework — POM

- Developed a scalable Robot Framework automation framework using Python, SeleniumLibrary and the Page Object Model (POM) to automate Login, Inventory, Cart, Checkout and Order workflows.
- Implemented reusable keywords, page objects, resource files, Data-Driven Testing, Cross-Browser execution and automatic screenshots on failures.
- Generated Robot Framework Reports, Logs and designed the framework for Allure Reporting and Jenkins-based Continuous Integration.

E-Commerce Web Application (QA Testing Project)

Tech Project

Tools: Postman, JIRA, Chrome DevTools

- Tested core e-commerce modules (Registration, Cart, Checkout, Payments) using positive, negative, and boundary test scenarios.
- Conducted manual API validation via Postman for product/order endpoints; verified payloads, schemas, and response codes.
- Logged and managed defects through the bug life cycle in JIRA, verifying developer fixes prior to release builds.

Hospital Management System (QA Testing Project)

Tech Project

Tools: JIRA, TestRail, Manual Testing

- Designed and executed detailed test suites for Patient Registration, Appointment Scheduling, Doctor Management, and Billing modules.
- Performed Functional, Regression, Smoke, and Exploratory testing to successfully uncover critical workflow bottlenecks.

AI Fitness Trainer

Jan 2025

Technologies: Next.js, JavaScript, Tailwind CSS, Convex, Gemini AI, Vapi AI, Clerk

- Developed a full-stack AI-powered fitness application featuring secure authentication, personalized workout generation, voice-based AI interactions, and cloud-based data management.
- Integrated Gemini AI for workout recommendations, Vapi AI for voice assistance, Clerk for authentication, and Convex as the backend database.
- Performed functional and UI testing to validate core user workflows, authentication, and application usability before deployment.

INTERNSHIP & CERTIFICATIONS

Machine Learning Intern – Remote

Certifications: Core Java — Python Programming — Machine Learning

EDUCATION

Bachelor of Computer Applications (BCA) — Maulana Abul Kalam Azad University of Technology 2022–2025
CGPA: 7.11

Intermediate Education (Class XII) — Familia School

Graduated: 2022 — **Percentage: 77%**

Secondary Education (Class X) — Familia School

Graduated: 2020 — **Percentage: 87.6%**
